## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 2-5, 7, 6 and 9-11 have been renumbered as 1-9 respectively.

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance claims 4-5:

Carvey et al., US Patent No. 6,359,879 B1, discloses a method and system called composite trunking. Carvey does not teach or fairly suggest the following features, which are recited in each independent claim of the present application:

A method for load balancing in a link aggregation environment, with multiple ports of a network switch being trunked together to form a single logical link, comprising the steps of:

*determining a length of a first frame and a length of a second frame entering the link aggregation environment;*

*determining a flow rate of said first frame and a flow rate of said second frame entering the link aggregation environment;*

*determining if said flow rate rates exceed a predetermined flow rate threshold;*

*determining if said first frame and said second frame are candidates for link switching; and*

*switching a transmission link for at least a portion of a packet flow for the flow rate for said second frame from a first transmission port to a second transmission port, of said multiple ports as recited in claim 4.*

Claims 1-3, 6, and 7-9 are allowed for reasons given in the previous Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
